

Supply Chain and Production Manager

C-RAD is a global medical device company with head quarter in Uppsala. We develop, produce, maintain and sell innovative solutions to healthcare customers. The focus is on patient positioning, monitoring and imaging within radiation therapy. We are market leader in the field of optical patient positioning. C-RAD is a stock listed company at NASDAQ OMX Nordic Exchange. C-RAD group consists of three daughter companies in Sweden and sales offices in the USA, Germany, France and China. C-RAD is ISO 13485 certified.

Our core values are Professional, Organized and Honest.

Join C-RAD to fight cancer

Our products enable precision health through positioning and monitoring of patients in radiation therapy, which maximize the dose in tumours and minimize the dose in surrounding tissues.

We are currently looking for Supply Chain and Production Manager to strengthen our Operations team. The Supply Chain and Production Manager is accountable for overseeing and managing company's overall supply chain, production and logistics strategy and operations to maximize the process efficiency and productivity, all aligned with the QMS and regulatory directives.

Within this position you will have personnel responsibility for order processing and production/supply chain team.

Responsibility

- Oversee the operations of order processing, supply chain, logistics and production including the design of the organizational structure adequate for achieving the department's goals and objectives
- Establish, develop, implement and monitor the supply chain and production strategy, plans and processes
- Support in company tactical initiatives
- Continuously optimize the production and supply chain to maximize efficiency and productivity and reduce cost.

- Manage the budgeting and forecasting processes for supply chain and production
- Participate in key decisions as a member of the operational management team
- Full responsibility for leading and developing the staff, hiring and salary setting
- Supplier management including supplier assessment, supplier agreements and negotiations
- Strategy for managing spare part stock including ERP set-up
- CMO management
- Production forecasting
- Management representative for Production and supply chain in development projects

Profile

- Master's degree in Engineering or equivalent business experience
- 5-10 years of experience in production and supply chain in a line/project management position, preferably in the field of medical device products
- Strong leadership and management skills
- Strong organizational skills and drive to build and develop teams and individuals
- High level of self-motivation and the ability to motivate team members
- High level of written and oral communication skills in English
- Ownership and drive to design, implement and monitor strategies, plans and procedures
- Experience in working with agreements
- Negotiations skills
- Experience working with Contract Manufacturing
- Experience in C-RAD products or other surface tracking systems is desired.

What we are offering you

- Interesting position in an innovative, fast growing international company with a great team spirit
- A fun and constantly changing work environment with skilled colleagues and exciting products with new technologies
- Short decision-making processes supporting an efficient working environment
- Attractive possibilities for self-development and career progression
- Competitive compensation package
