

Job Description

Supply Chain Engineer

Company:

C-RAD is a global MedTech Company with its headquarter in Uppsala.

We are developing and selling innovative solutions for cancer treatment. The focus is on a cutting-edge technology for patient positioning, monitoring and imaging within radiation therapy.

We are market leader in our field and have established a global presence. C-RAD is a stock listed company at NASDAQ Stockholm.

We are looking for a Supply Chain Engineer to strengthen our team.

Your contribution to our success:

The Supply Chain Engineer is accountable for executing company's overall supply chain, production and logistics strategy and operations to maximize the process efficiency and productivity, all aligned with the QMS and regulatory directives.

Responsibilities:

- Monitor, plan and implement process improvements for Supply Chain from customer order to product delivery on site, to maximize efficiency and productivity and reduce cost.
- Responsible for design and implementation of the Supply Chain in the introduction of new products.
- Production and supply chain representative in development projects
- Evaluate suppliers and perform supplier assessments.
- Handle the operational part and follow-up of Design Transfer and ECOs between the C-RAD and the C-RAD CMOs.
- First point of contact for CMOs and Suppliers, and for your colleagues from Order Processing, Production, Logistics and Purchasing regarding product support and improvements.
- Maintain the top-level product configurations and pricing in the ERP and CRM system regarding Price list changes and component traceability
- Suggest and implement solutions for process improvements in the company ERP and CRM system
- Suggest improvements and where applicable implements processes to minimize shipping cost and maximizing delivery accuracy

- Administrate customer complaints and handle the communication with CMOs and Suppliers regarding implementation of corrective and preventive actions
- In cooperation with Service set up and maintain appropriate levels for Spare part stock and streamlining the refurbishment process
- Maintain spare part pricelists
- Build and maintain good relationships with C-RAD CMOs and Suppliers

Competencies:

- A bachelor's degree in engineering or equivalent business experience
- At least 3 years' experience working with Supply Chain
- Additional experience from logistics or production
- Team working and communication skills
- Fluent English

The Supply Chain engineer is a member of the Supply Chain and Order Processing team and reports directly to the Supply Chain and Production Manager (SCPM).

What we are offering for you:

- Interesting position in an innovative, fast growing company
- Young team within a global positioned organization
- Short decision-making processes supporting an efficient working environment
- High level of individual responsibility and attractive possibilities for self-development
- Our core values are: Professional, Organized and Honesty

Next steps:

Candidate assessment is done on a rolling basis.

If this vacancy is attractive for you, we are very much looking forward to receiving your application:

Peter Nyman
